RGTS GEOGRAHY CURRICULUM MAP

THE JOURNEY OF AN RGTS GEOGRAPHER

KEY CONCEPTS

- Local actions have global consequences and vice versa.
- An increasing ability to use maps and data to interpret patterns and distributions at a scale increasing to global.
- Understanding how physical and human processes shape places.
- An increasing sense of their own place and location within a widening world.

DISCIPLINARY SKILLS

- Use of data
- Questioning
- Personal opinion justification

YEAR 11

- Physical landscapes in the UK
- Human landscapes in the UK
- Geographical investigations
- People and the biosphere
- Forests under threat
- Consuming energy

YEAR 10

- Global hazards
- Global hazards
- Development dynamics
- Development dynamics
- Urbanisation
- Urbanisation

YEAR 9

- Unstable plate margins
- The Middle East
- Coasts
- Asia and Russia
- Population
- GCSE prep

YEAR 8

- Africa
- Rivers
- Ecosystems
- Extreme environments
- Disease
- Climate change

YEAR 7

START

- Map Skills
- Rural versus urban
- Weather and climate
- Development
- Restless Earth
- Tourism
